Technical Skills

JavaScript, ReactJS, React-Native, Expo, ExpressJS, NodeJS, Python, ILE RPG, IBM i OS, MongoDB, SQL, GraphQL, HTML5, CSS3, ES6, Responsive Design, Bootstrap, Git, GitHub

Projects

BANYAN AIR SERVICES

Business app for both employees and customers of the largest F.B.O in Florida. Besides user-specific features like flight reservations for pilots or work order approvals for managers, the app includes push notifications, sensitive data encryption, and user registration.

Technologies: JavaScript, React-Native, Context API, NodeJS, SQL, ILE RPG, IBM i OS, Jest

<https://apps.apple.com/us/app/banyan-air-services/id1576872343>

SUPER-DIRECTORY

Search directory for all superheroes, but biased towards Marvel as fan favorite comics are displayed for Marvel heroes.

Technologies : HTML5, CSS3, JavaScript, ReactJS and Marvel, Superhero & YouTube API

<https://super-directory.netlify.com/>

TRAKSTER

Mobile-first expense calculator with a minimalist landing page. I added an Express/Mongo backend and down the line, new features will also be added soon.!

Technologies : HTML5, CSS3, JavaScript, ReactJS, Node.js, Express.js, MongoDB

<https://trakster.herokuapp.com/>
